STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

ANDORRA
DELTA 37
BLACK
Gold Glass Seed
Honed with grit
sealer

A small, dark black base dominates the look of this product with a white/cream pebble featuring as a highlight.

Things you should know

The classic look of a black roadway is enhanced by the inclusion of a large white/cream pebble and seeded with Gold Glass chips by others.

The almost polished nature of the surface finish alters the appearance considerably and the use of grit in the sealer is essential to improve slip resistance. Not recommended for pavements on a significant incline.

Visit our showroom to appreciate the tactile qualities of this product.
