STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

ALPINE ICE BLACK

High contrast is achieved by blending crushed milky brown quartz with an ash and black pigment base. Try reversing the concept - have a look at BroadPeak Ivory.

Things you should know

The nature of the stone used in this product is that it can be quite harsh on the skin due to the shape of the particles created at the quarry after being processed through a crushing plant.

Visit our showroom to appreciate the tactile qualities of this product.

SPECIFICATION:

Vic Mix Alpine Ice Black
25MPa Exposed Aggregate
Concrete

ORDER CODE:

X_ALPIBK

REVISION: 15/02/2017
