STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

BEACH ASH HALF NUBIAN CLAY

Naturally occurring, large white/orange quartz pebbles set in an ash and Half Nubian Clay pigment base.

Things you should know

Certainly not a look for the faint hearted. A bright, attention seeking colour is used in the base to produce a product that stands out in the crowd.

The colour of the pebble appearing predominantly white help the projected colour to appear somewhat pink from a distance.

See what happens when you substitute a Black base in place of the Nubian Clay, take a look at Black Beach.

SPECIFICATION:

Vic Mix Beach Ash Half
Nubian Clay 25MPa Exposed
Aggregate Concrete

ORDER CODE:

X_BCHHN
