PRODUCT NAME:

## Green Star Concrete

- ❖ 40% Portland Cement content reduction
- ❖ 25% of Fine Aggregate replaced by Manufactured Sand
- ❖ 95% Reclaimed water

The Green Star Scheme is one of many rating systems designed to encourage and recognise the reduction in greenhouse gas emissions, resource use and waste. The scheme is based on awarding credit points for compliance with specific criteria.

### Things you should know

Typically result in a full 3 Star compliance with the Green Star guidelines. "Mat-4 Concrete"

Also available in different strengths and aggregate sizes.

SPECIFICATION:

Vic Mix Green Star Concrete

ORDER CODE:

Green Star

REVISION: 01/06/2021

The Concrete Supplier will not be responsible for the addition of water on site by non - authorised personnel, or in the case where the customer or his/her representative (ie. Pump Operator) has requested water to be added beyond the agreed parameters of the mix. Excessive use of water to achieve increases in slump may significantly affect the cohesiveness, pumpability, setting time, strength, permeability, shrinkage and durability of the concrete.
